

The range of high-end segment of wheel balancers is completed by the **evolution of the EM9580 model**, with a 19 or 22" wide screen monitor, now in the **Plus version**.

EM9580 C ^{plus} LaserLine

plus

SMART ARM PLUS

The wheel dimensions are detected using the **new internal Smart Arm Plus gauge for rims up to 28"**, which automatically activates the balancing programmes and has an integrated laser pointer that exactly indicates the adhesive weight memorisation planes.

AWD SONAR

Automatic measurement of wheel width with **sonar**

LASER LINE

Laser indicator at 6 o'clock for quick and ergonomic application of the adhesive weights

LED LIGHT

Led for **illumination inside** the rim
