

# ALLOY RIM CLAMPING RINGS

## General description

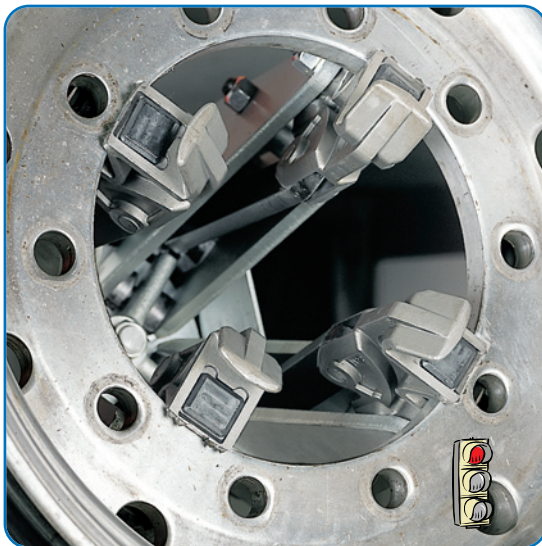

Alloy rim clamping rings are a simple, **universal system for clamping all alloy truck and bus rims, with no risk of denting and scratching.**

This system may be used on all truck tyre changers in the CORGHI range.

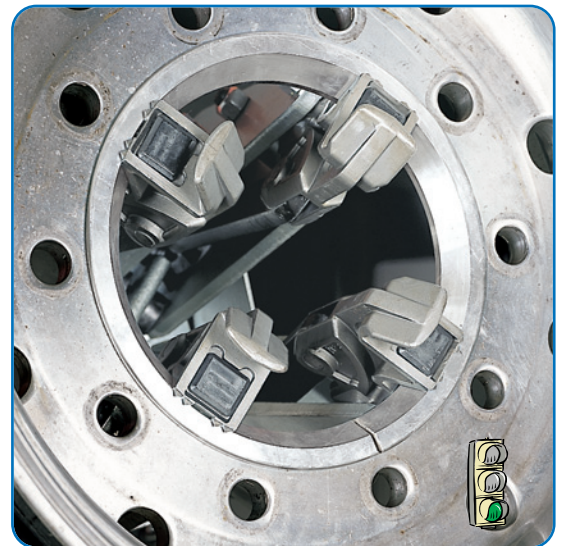

The four different ring sizes cover the entire range of alloy rims in use on the market.

## Main characteristics

- User-friendly adapter
- Protects the rim from damage and scratches
- 4 different diameters depending on rim central diameter

➤ Incorrect clamping procedure. Direct contact with clamp. Rim damage guaranteed

➤ Correct clamping procedure with ring. No direct contact between rim and clamp. Rim has maximum protection
